DISCLOSURE

- * To be determined on pricing date
- ** The CD must not be called prior to maturity to receive this participation rate. A CD will be called if the linked asset meets or exceeds the call value on the stated observation date.
- ≥ “at least,” for example $\geq 8.00\%$ is a contingent interest rate of at least 8%
- ≤ “at most,” for example $\leq 2.00\%$ is the call value of at most 2%
- note SC = sales charge, FS = fact sheet, DS = disclosure supplement, PT = performance tracker, p.a. = per annum

HSBC BASE
DISCLOSURE

An investor’s principal investment in Market-Linked CDs is FDIC insured up to the FDIC insurance limit. Payments in excess of the principal amount that are based on changes in the referenced asset are generally not FDIC insured, unless the payment amount has been determined before the bankruptcy has occurred. The FDIC insurance limit is currently \$250,000, including principal and any payments in excess of principal, for each insurable capacity of each depositor at each depository institution. FDIC insurance does not protect against loss if the MLCD is sold or redeemed prior to maturity. Amounts in excess of the FDIC limit are subject to the credit of the issuer. Prior to any purchase the client must receive and review the entire Disclosure Supplement as well as the CD Base Disclosure, if applicable.

Some of the underlying reference assets are represented by their ticker symbols. The full name of the reference asset can be found in the offering documents.
