

The S&P International Dividend Aristocrats Portfolio invests in companies from the S&P Global Dividend Aristocrats Index. The index consists of 100 companies from the S&P Global Broad Market Index that have increased dividends or maintained stable dividends every year for at least 10 consecutive years, as determined by the index provider.

PORTFOLIO SELECTION PROCESS

- Begin with the stocks that comprise the S&P Global Dividend Aristocrats Index and exclude all companies from the U.S. and emerging market countries.
- Rank each stock on three equally weighted factors:
 - Debt-to-equity. Compares a company's long-term debt to their stockholder's equity. Higher levels of this ratio are associated with higher risk, lower levels with lower risk.
 - Price-to-cash flow. Measures the cost of a company's stock for every dollar of cash flow generated. A lower, but positive, ratio indicates investors are paying less for the cash flow generated which can be a sign of value.
 - Return-on-assets. Compares a company's net income to its total assets. The ratio shows how efficiently a company generates net income from its assets.
- Purchase an approximately equally weighted portfolio of the 25 stocks with the best overall ranking on the three factors with a maximum of seven stocks from any one of the major Global Industry Classification Standard (GICS®) market sectors and a maximum of seven stocks from any one country.

PORTFOLIO SUMMARY

Initial Date of Deposit:	7/12/2019
Initial Public Offering Price:	\$10.00 per Unit
Portfolio Ending Date:	10/13/2020
Historical 12-Month Distribution Rate of Trust Holdings:*	3.23%
Historical 12-Month Distribution Per Unit:*	\$0.3226
CUSIPs:	30311C 344(c) 351(r)
Fee Accounts CUSIPs:	30311C 369(c) 377(r)
Ticker Symbol:	FZEVAX

*There is no guarantee the issuers of the securities included in the trust will declare dividends or distributions in the future. The historical 12-month distribution per unit and historical 12-month distribution rate of the securities included in the trust are for illustrative purposes only and are not indicative of the trust's distribution or distribution rate. The historical 12-month distribution per unit is based on the weighted average of the trailing twelve month distributions paid by the securities included in the portfolio. The historical 12-month distribution rate is calculated by dividing the historical 12-month distributions by the trust's offering price. The historical 12-month distribution and rate are reduced to account for the effects of fees and expenses, which will be incurred when investing in a trust. Certain of the issuers may have reduced their dividends or distributions over the prior twelve months. The distribution per unit and rate paid by the trust may be higher or lower than the amount shown above due to certain factors that may include, but are not limited to, a change in the dividends or distributions paid by issuers, actual expenses incurred, or the sale of securities in the portfolio.

PORTFOLIO OBJECTIVE

This unit investment trust seeks above-average total return through a combination of capital appreciation and dividend income; however, there is no assurance the objective will be met.

WHY INVEST IN COMPANIES WITH A HISTORY OF GROWING DIVIDENDS?

QUALITY | Companies that have been able to consistently grow their dividend have a tendency to be higher quality compared to those of the broader market in terms of earnings quality and leverage, in our opinion. A company's ability to reliably increase its dividend for years, or even decades, can be an indication of its financial strength or discipline.

BUFFER AGAINST MARKET VOLATILITY | Dividend growth companies may be attractive to investors looking for disciplined companies that can endure difficult market and economic environments. These companies typically feature healthy balance sheets and consistent cash flows that provide plenty of capital to effectively operate their business and fund a growing dividend.

ADDRESS THE POTENTIAL RISKS ASSOCIATED WITH RISING RATES | Unlike high dividend yield strategies which tend to be concentrated in companies from certain sectors that could come under pressure during periods of rising rates, dividend growth strategies tend to be more diversified and able to provide increased exposure to sectors that could become more desirable with improving economic activity and rising rates.

ANNUALIZED AVERAGE DIVIDEND GROWTH OF THE COMPANIES INCLUDED IN THE PORTFOLIO*

1-Year	7.87%
3-Years	7.20%
5-Years	7.12%

*Sources: Bloomberg and Compustat. All data as of 12/31/18. Dividend growth was calculated based on the S&P Global Dividend Aristocrats Index's methodology which states that to determine annual dividend payments, the dividends of the parent and spun-off companies are combined until a full annual cycle of dividend payments is available for both post-spin-off companies. Data is for illustrative purposes only and is not indicative of any actual investment. Past performance is no guarantee of future results.

You should consider the portfolio's investment objective, risks, and charges and expenses carefully before investing. Contact your financial advisor or call First Trust Portfolios L.P. at the number listed below to request a prospectus, which contains this and other information about the portfolio. Read it carefully before you invest.

RISK CONSIDERATIONS | An investment in this unmanaged unit investment trust should be made with an understanding of the risks involved with owning common stocks, such as an economic recession and the possible deterioration of either the financial condition of the issuers of the equity securities or the general condition of the stock market.

Certain securities held by the portfolio are issued by companies in the Asia Pacific region, making the portfolio more susceptible to the economic, market, regulatory, political, natural disasters and local risks of the Asia Pacific region. The region has historically been highly dependent on global trade which creates a risk with this dependency on global growth. The stock markets tend to have a larger prevalence of smaller companies that are inherently more volatile and less liquid than larger companies.

Certain securities held by the portfolio are issued by companies in Europe. The United Kingdom vote to leave the European Union and other recent rapid political and social change throughout Europe make the extent and nature of future economic development in Europe and the effect on securities issued by European issuers difficult to predict.

The information presented is not intended to constitute an investment recommendation for, or advice to, any specific person. By providing this information, First Trust is not undertaking to give advice in any fiduciary capacity within the meaning of ERISA, the Internal Revenue Code or any other regulatory framework. Financial advisors are responsible for evaluating investment risks independently and for exercising independent judgment in determining whether investments are appropriate for their clients.

NOT FDIC INSURED | NOT BANK GUARANTEED | MAY LOSE VALUE

SALES CHARGES (BASED ON A \$10 PUBLIC OFFERING PRICE)

STANDARD ACCOUNTS

Transactional Sales Charges: Initial 0.00%
Deferred 1.35%

Creation & Development Fee: 0.50%
Maximum Sales Charge: 1.85%

The deferred sales charge will be deducted in three monthly installments commencing 10/18/19.

When the public offering price is less than or equal to \$10.00 per unit, there will be no initial sales charge. If the price exceeds \$10.00 per unit, you will pay an initial sales charge.

FEE/WRAP ACCOUNTS

Maximum Sales Charge: 0.50%

The maximum sales charge for investors in fee accounts consists of the creation and development fee. Investors in fee accounts are not assessed any transactional sales charges. Standard accounts sales charges apply to units purchased as an ineligible asset.

The creation and development fee is a charge of \$.050 per unit collected at the end of the initial offering period. If the price you pay exceeds \$10.00 per unit, the creation and development fee will be less than 0.50%; if the price you pay is less than \$10.00 per unit, the creation and development fee will exceed 0.50%.

In addition to the sales charges listed, UITs are subject to annual operating expenses and organization costs.

HOLDINGS STYLE ANALYSIS

HOLDINGS SECTOR ANALYSIS

The style and sector characteristics of the portfolio are determined as of the initial date of deposit and may differ slightly from those indicated above due to the requirement that only whole shares be purchased for the portfolio and will likely vary thereafter due to market fluctuations in the underlying securities. For a complete description of these characteristics refer to the prospectus.

An investment in a portfolio containing equity securities of foreign issuers is subject to additional risks, including currency fluctuations, political risks, withholding, the lack of adequate financial information, and exchange control restrictions impacting foreign issuers.

An investment in a portfolio containing small-cap and mid-cap companies is subject to additional risks, as the share prices of small-cap companies and certain mid-cap companies are often more volatile than those of larger companies due to several factors, including limited trading volumes, products, financial resources, management inexperience and less publicly available information.

Although this unit investment trust terminates in approximately 15 months, the strategy is long-term. Investors should consider their ability to pursue investing in successive portfolios, if available. There may be tax consequences unless units are purchased in an IRA or other qualified plan.

As the use of Internet technology has become more prevalent in the course of business, the trust has become more susceptible to potential operational risks through breaches in cyber security.

The value of the securities held by the trust may be subject to steep declines or increased volatility due to changes in performance or perception of the issuers.
